

"La focaccia barese"

Ingredients (FOR 32/35 cm diameter round trail)

150 gr flour type "0" or "00" or "1" (240-260 w)*

150 gr remilled durum-wheat semolina*

240 ml warm still water

3gr dry yeast or 7gr fresh yeast

8 gr fine salt

3 gr sugar

30 ml EVO olive oil

100 gr black olives without stone, in the Pugliese tradition we prefer unpitted olives

300 gr cherry tomato (o piccadilly tomato)

Oregano

*option flour: 100 gr remilled durum-wheat semolina, 100 gr whole wheat flour, 100 gr type 1 flour (or Type 00)

Preparation

1st step

In a big bowl sift the flours, add 30 ml of EVO oil, add the yeast, the sugar and slowly the water, start to knead with a fork, or spatula or your hand.

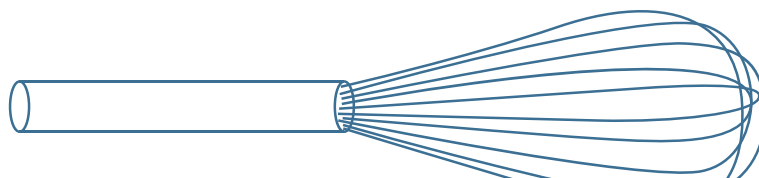

If you are using the fresh yeast, in a little bowl add the yeast and sugar in the water and then mix all together; and then pour slowly the water in the flour mixing slowly with a spatula or fork.

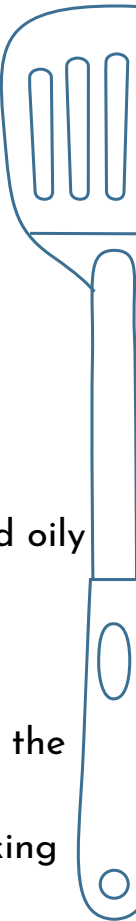

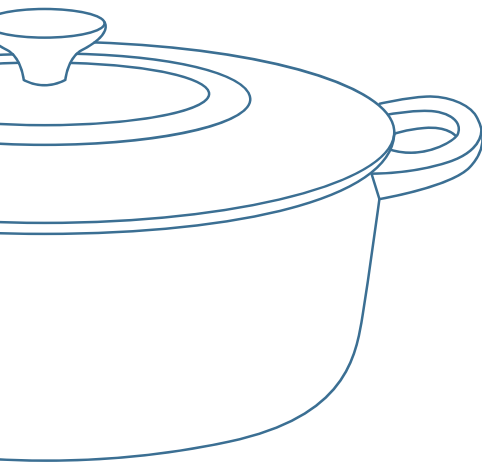

2nd step

When the dough has the shape of a sticky ball, add the salt; at this point, knead vigorously so that the air enters the dough.

3rd step

Cover the bowl with cling film and leave to rise for 1 hour if the room temperature is 28/30 degrees Celsius, 90 minutes if the temperature is 22/25 degrees Celsius.

4th step

While the dough rises, in a bowl you break up with your hands, the tomatoes collecting the tomato water in the same bowl, season with EVO oil and oregano. Take a big baking sheet (32/35 cm diameter if it is round, also square is good) and oil it with EVO oil.

5th step

The dough is ready, wet your hands with a mixture of evo oil and water and pour the dough into the well-greased baking tin.

And slowly and very gently roll out the dough but not completely all over the baking tin, sprinkle the dough with the tomatoes and olives, making sure every space is covered, then cover with cling film and leave to rise for a further 45 minutes (at 25/28° celsius) or 60 minutes (at 22° celsius).

6th step

The dough is ready when cover all the baking sheet and and doubled in height, at this point take off the cling film and wet the focaccia with the tomato "water" that you have seasoned before and add some rock salt.

7th step

Preheat the oven to 250° Celsius and bake the focaccia for 20 minutes in total: 10 minutes in the lowest part of the oven and further 10 minutes in the middle part of the oven, another 3 minutes on the grill mode to complete the baking.

Remember the focaccia should be well cooked at the base.

Take it out of the oven and let it rest for a few minutes and then enjoy it in good company, with a glass of cold wine or beer and some salami or ham.

Enjoy food in good company.
